## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18, drawn to a disc-shaped information storage medium formed with notches and having a data area and a clamp area; or a disc cartridge with a case provided with marks indicating sides A or B and the type of disc, classified in class 369, subclass 275.1.
  - II. Claims 19 & 20, drawn to recording apparatus for a disc-shaped recording medium or a disc cartridge with a case having detectors and a control unit, classified in class 369, subclass 53.2.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the recording apparatus does not require an information storage medium with notches provided at a portion of a peripheral side, center hole, or clamp area. The subcombination has separate utility such as storing information.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2652

4. In the event Group I is elected; this application contains claims directed to the following patentably distinct species of the claimed invention:

Recording medium of figures:

- a. 1A-1C
- b. 2A
- c. 3A & 3B
- d. 4A & 4B
- e. 5A-5E
- f. 6
- g. 7
- h. 8A-8C
- i. 9A-9B

5. In the event Group II is elected; this application contains claims directed to the following patentably distinct species of the claimed invention:

Recording apparatus of figures 10-11B using recording mediums of figures:

- a. 1A-1C
- b. 2A
- c. 3A & 3B
- d. 4A & 4B
- e. 5A-5E
- f. 6
- g. 7

Art Unit: 2652

h. 8A-8C

i. 9A-9B

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. No telephone call was made to request an oral election to the above restriction requirement, due to the complexity thereof.

Art Unit: 2652

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Vincent Agustin whose telephone number is (703) 305-8980. The examiner can normally be reached on Monday thru Friday 9:00AM - 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa Nguyen can be reached on (703) 305-9687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
